

BOE Strategic Plan Development Process

The Board of Education, in collaboration with the Superintendent and GPS Staff, has launched a year-long strategic planning initiative. The Board of Education selected the Public Consulting Group (PCG) through a competitive RFP process as the strategic planning facilitator. A high priority in the initiative will be broad involvement and input, transparency, and regular communication.

PCG will be working in partnership with the Greenwich Public Schools to facilitate the development of a strategic plan. This includes defining organizational goals and developing action plans with recommended measures of success. PCG will provide an interactive, transparent approach in which members of the community will help to shape a positive future vision. Working closely with educators, administrators, students, families, and community members, PCG will support the development of a plan that meets the unique needs of our schools and community, builds on existing strengths, and draws from best practices. At the end of the process, we will have a set of district strategic goals and priorities, supported by action plans, measures of success, and opportunities for further reflection in which action and outcomes are directly connected.
